

Watch Flipping Arbitrage: The Beginner's Guide To Flipping Your First Watch For Profit and Then Scaling To \$10k/Mo

Flipping Luxury Watches - The Six Figure Side Hustle You've Never Heard Of

In the next few minutes, I'm going to give you a look into the secret world of luxury watch flipping.

And by the end of this guide, not only will you know more about flipping luxury watches than 99% of the population...

You'll also learn the exact strategy you can start using today to flip your first profitable watch in a matter of days....

And then repeat the process to earn thousands of dollars per month.

This is hands down one of the fastest and most simple ways to earn extra income as long as you're willing to take action and put in the effort.

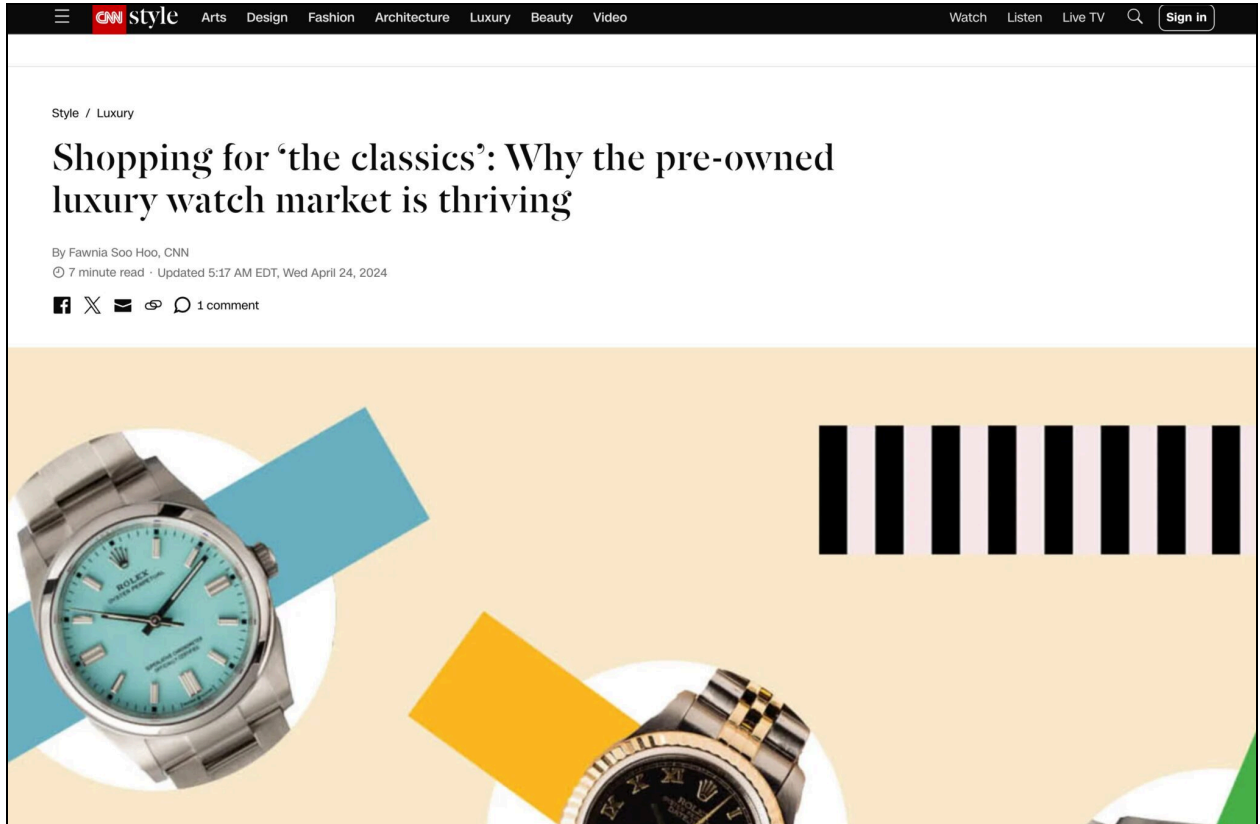

But you might be wondering, why flip luxury watches?

Better question is... why not?

A single watch flip can earn you at least \$500 profit.

And once you start working with more expensive watches, you can earn anywhere from \$1,500-\$10,000+ profit PER WATCH.

Plus the used luxury watch market alone is set to cross \$30 billion dollars by 2025 (according to a study done by research consulting firm McKinsey & Company).

Flip just a handful of watches per month, and you literally create a job-replacing income out of thin air.

And no...

Flipping luxury watches does **NOT** involve buying brand-new watches, dropshipping watches from China, becoming a certified jeweler, or even needing to stock up on tons of inventory.

With watch flipping...

✅ **You don't need a big budget to start** - You only need \$1,500 to buy your first watch (there are even secret hacks you can use to get started without using any of your own money).

✅ **You don't need to know anything about the luxury watches** - Most of my students knew nothing about watch brands, how watches work, or anything about the industry when they first got started.

✅ **You don't need to worry about getting scammed or buying fakes** - I know this is a big fear of many people. But don't worry, using my system, you eliminate almost all risk of losing money in this game.

✓ **You can do this anywhere in the world** - As long as you have access to the internet and shipping. I have students in the US, Canada, UK, and Australia all flipping watches from the comfort of their own home.

✓ **You can start making your first profits FAST** - It's not uncommon to do your first profitable watch deal in a matter of days when you follow our strategies.

✓ **It's a predictable and consistent way to make money** - Follow the process, buy the right watch, at the right price, and you're virtually guaranteed to generate a profit making this one of the most predictable side hustles.

In fact... I would hardly even call this a 'business' because it's that simple.

If you're reading this then I can bet there's a good chance you are looking for a way to make some extra money.

Because here's the harsh reality of the world we live in today...

Wages haven't kept up with cost of living.

Hundreds of thousands of people are affected by layoffs.

More and more people are turning to side hustles to cover their basic cost of living.

The image is a screenshot of a news article header. At the top left is the 'make it' logo with a small 'cnc' logo next to it. To the right of the logo are social media share icons for Facebook, X, LinkedIn, and Email. Below the logo is a dark grey bar with the text 'RELATED STORIES'. To the right of this bar is a light green bar containing four article teasers: 'EARN The 10 U.S. cities where renters' incomes go the furthest', 'WORK 1 in 3 companies are ditching college degree requirements for salaried jobs', 'CLOSING THE GAP 60% of people who work multiple hourly jobs are women—here's why', and 'SP... Th... co'. Below the green bar is a white box with the word 'WORK' in blue, followed by the main headline: '44% of people with a side hustle think they'll always need it — and more are picking one up'.

And they're doing stuff like Uber, DoorDash, freelancing, dog walking, etc...

While those can technically work, you're literally trading time for money.

Which means you're essentially working a second job.

Nobody wants that.

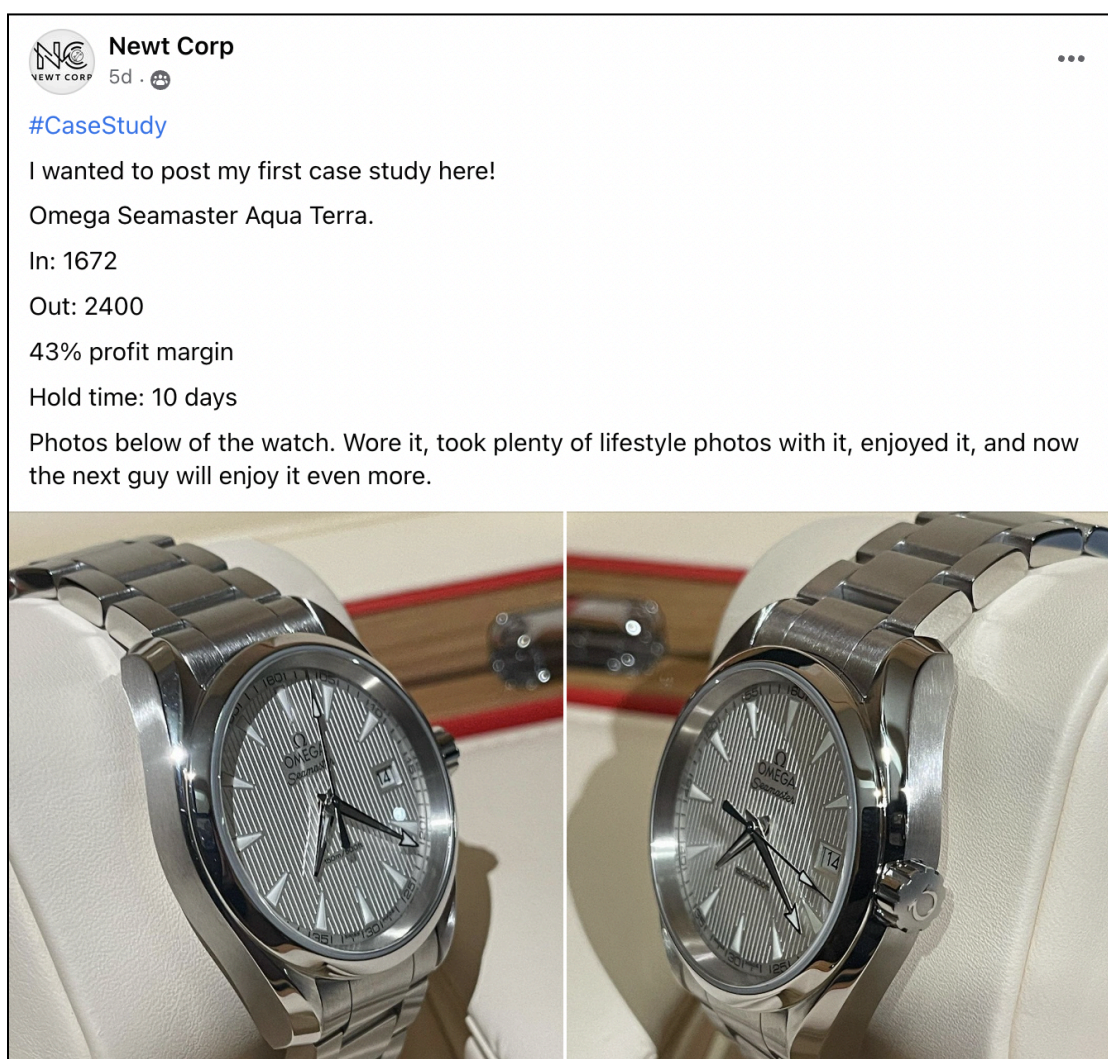

But watch flipping arbitrage is one of the few side hustles that gives you true flexibility, stability, and unlimited income potential in an industry that only continues to grow year-after-year.

And most importantly...

You don't have to wait weeks or months to see results.

In fact, when you follow the system I'm about to show you, you can start seeing results on your very first watch deal in a matter of days like these students...

\$728 profit in 10 days on Newt's very first deal

In: \$7,200 (shout out [Hudsonwatch Dan](#))
Out: \$8,250 (FB marketplace)
Fees: \$0
Net Profit: \$1,050
ROI: 15%
Hold Time: 6 days (3 days after posting watch)
On to the next one...

Now, please be aware, these results are 'typical' ONLY if you take action and follow the system I'm about to show you.

A lot of people try to go about this on their own and end up losing money or getting burned in the process.

Follow the system and it's practically impossible to NOT profit on your very first deal as you just saw above..

Sounds fair enough?

Okay cool.

But before I reveal the strategy, let me introduce myself...

Watch Flipping Saved My Life (Literally)

Hey, my name is Pejman Ghadimi (but most people call me PJ).

Me (far left) awarding some of our six-figure watch trading students

I'm a serial entrepreneur, investor, best-selling author, and for over the past two decades, I've been collecting and flipping luxury watches.

I always had a passion for the 'finer things in life' and enjoyed the experiences of luxury cars, watches, travel, etc.

And I quickly learned that luxury goods like watches can actually be assets instead of liabilities as long as you understood how to play the market.

But it wasn't until I bought my first luxury watch over 10 years ago (a Panerai 104) for \$3,000 and sold it for \$4,500 (making a \$1,500 profit).

Panerai 104 pictured on the right

Now to be fair... \$1,500 wasn't a ton of money.

But it was the 'aha' moment I'd been looking for.

Because right around the time this happened, I also was let go from my six-figure corporate banking job.

Obviously this caught me by surprise.

But more importantly, I lost faith in the so-called “American Dream” that the corporate world should’ve provided.

With nowhere to turn, I started to buy, sell, and trade luxury watches to supplement my income.

Truthfully, it took me a couple dozen deals to ‘figure it all out’.

From which watches were popular...

To where to find deals...

To determining what was the best price to pay...

To how watch manufacturers and jewelers operate...

But once I figured out a process...

It began to snowball FAST.

\$5,000 profit months became \$5,000 profit weeks.

\$5,000 weeks became \$5,000 profit days.

\$5,000 days became \$5,000 profit deals.

Since then, I’ve gone on to make millions per year flipping luxury watches out of the comfort of my own home.

And the best part?

I’m a one man show.

I don’t have any staff.

I don’t run a jewelry store or shady pawn shop.

I don’t need any sort of special license to buy and sell watches.

In fact, I can run my entire operation with just my phone and access to FedEx lol.

Not to mention the fact that I do this in my spare time while balancing my family and other businesses.

But I know what you’re probably thinking...

“There’s no way I can make millions of dollars”

And guess what? You’re absolutely right.

The money I’ve made is the result of doing this for nearly 20 years.

But here’s the crazy part...

What took me years to achieve and figure out, you can start doing in a matter of months, if not days.

And while you may not make millions... anyone who follows our system and takes consistent action can still get amazing results and change their lives forever.

Just like...

And We Have Killers Like Lucas, Who Was Able To Scale To \$550k Profit In 17 Months While Running Operating a Real Estate Development Business As His Primary Focus

Lucas T Mind ▸ Watch Trading Academy Insider Members

Top contributor · May 6 · 🌐

I started my journey with WTA 17 months ago (Dec 2022). Since then I have made over 550k in net profits.

First 100k took 7 months
Second 100k took 4 months
Third 100k took 2 months
Most recent 100k took 42 days

This is a compounding game. The effort you put in now will pay dividends in the future. So many give up before they get to the top of the mountain (or even worse, they never start the climb). All that resistance on the way up leads to a snowball effect on the way down the other side.

This game happens at different paces for different people. Don't compare yourself to others but instead realize that no matter the time it takes, it gets easier and more rewarding. Everyone starts with a different set of experiences, skill, and capital. But one thing has been proven over and over again... if you trust the process, invest in your education, and take control of your life, amazing things are bound to happen.

Now I don't use the term "life-changing" lightly...

But flipping just a few luxury watches per month can change your financial future forever.

Imagine what an extra \$2,500, \$5,000, or even \$10,000 per month would do for you?

Since 2017, I've helped over 22,000 people get started with this opportunity and I can't wait to share with you how you can get started too.

How Flipping Watches Works: The Simple 3-Step Process Anyone Can Follow To Virtually Guarantee a Profit On Their First Deal

Most people think flipping watches is as simple as buy low, and sell high.

While that's technically not wrong, there is a science to this madness.

Here's a basic overview of how our system works in 3 simple steps:

Step #1 - Watching Buying 101: How to Buy The Right Watches With Zero Risk Using The "Bottom Cash Value" Formula

The first tip to becoming successful at watch flipping is buying the watch.

Duh!

But remember, we're not just buying *any* watch.

Our focus is on used luxury watches that are highly desirable and still retaining their value.

In other words...

Watches from brands like Timex, Fossil, Bulova, Citizen, etc... are NOT watches to go after.

These watches are cheaply made, mass produced, and hold no real value.

However...

Watches from brands like Rolex, Omega, Breitling, Tag Heuer, Panarai, etc... ARE real luxury watches that hold or even increase in value (not always but can).

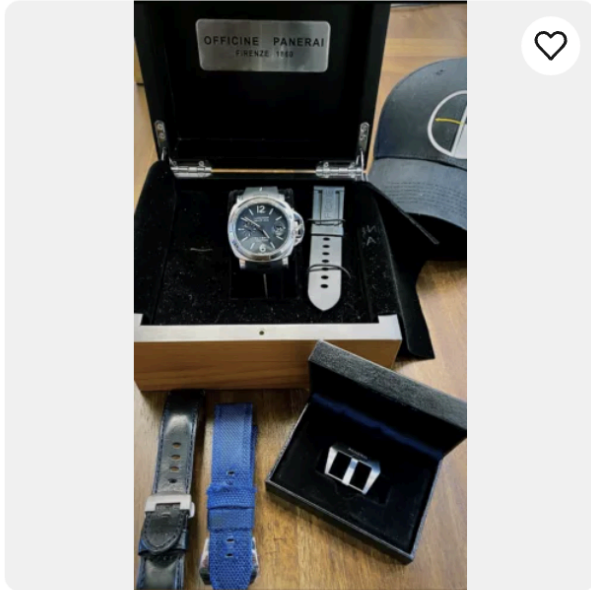

These watches have real mechanical movements, are handmade, and are admired by watch collectors for those specific reasons.

In other words, the watches you see at your local Macys or Costco are almost never real luxury watches.

Remember my very first watch I flipped almost 20 years ago for \$4,500?

Here's the price of that same watch TODAY:

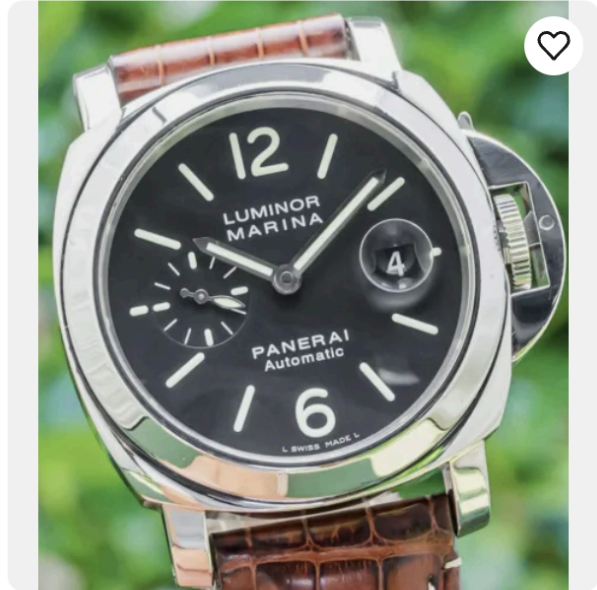

Panerai Luminor Marina PAM104 Black Dial
44mm Rubber Band Automatic Mens...
Pre-Owned · Panerai Luminor · Rubber

★★★★★ (2)

\$4,950.00

or Best Offer
Free shipping

Panerai 104 Luminor Marina Black Boxes
Alligator Deploy Brown PAM00104 PAM...
Pre-Owned · Panerai Luminor · Leather

\$4,395.00

or Best Offer
+\$40.00 shipping

It's still hovering around the same value.

That's a perfect example of why watches are one of the safest assets you can buy and sell.

Unlike volatile assets like stocks and crypto that can crash literally overnight... the right watch will never be worth zero.

And while there are dozens of luxury watch brands you could go after, here are just some of the most popular ones you can get started with today for as little as \$1,500 used:

Bell & Ross

BREITLING
1884

TUDOR

Cartier

ULYSSE NARDIN
SINCE 1846 LE LOCLE - SUISSE

HUBLOT

OFFICINE
PANERAI

ROLEX

OMEGA

But that begs the next question - how do you know how much to pay for a watch?

That's where the "Bottom Cash Value Formula" comes in.

Let me explain it in the simplest way possible.

Have you ever gotten a car appraised at CarMax?

If not, you can basically bring any car to them and they'll give you a same day cash offer to buy your car on the spot.

The Bottom Cash Value is essentially the same thing a jeweler or pawn shop will pay you to take that watch off your hands.

To get this number for any watch, you can use any of the 3 methods below:

1. **Contact A Local Dealer/Jeweler And Tell Them You're Looking To Sell.** This can be a simple phone call where you say...*"Hey Watch Dealer, I have a [MAKE MODEL WATCH] for sale and I am looking to move it. Here is the reference number. It comes with X, Y, Z. Please let me know how much to take this watch off my hands TODAY."*
2. **You can submit a form online saying you want to sell your watch** on sites like the1916company.com and they'll come back to you with a quote.
3. **You can see what people are paying for watches** on auction sites like eBay or Grailzee.com.

The #1 Goal Is To Buy Watches As Close To The Bottom Cash Value Number As Possible To Minimize Your Risk of Overpaying, Losing Any Money, and Virtually Guaranteeing a Profit

Please read that again 100 times.

If you can't buy a watch near the Bottom Cash Value number, then do **NOT** proceed.

Because the Bottom Cash Value number is your "fail safe" so that you can pull all your money out at any given time without risk of losing your initial investment.

It's better to be safe than sorry in the watch game.

Your wallet will thank you later.

In other words, if you can't sell it or need to liquidate fast, you can walk into any pawnshop or jeweler and get all of your money back.

Here's where the magic happens...

As long as you buy the right watch, at the right price, it's virtually impossible to lose money.

Take a look at Eric's first year of flipping watches...

Eric

March 1 · 🗨️

Case Study : my first year of part time watch trading.

Hey guys, I wanted to do a quick case study showing how my first year went as a member of WTA. I had never bought/sold anything online prior to starting here, and had \$3k to initially invest in watch trading.

My first buy was a Breitling Navitimer A23322 on leather strap. I paid \$2950 and was scared shitless the minute I handed over my cash to the seller (I drove 8 hours round trip to Atlanta from Charlotte, NC because I was so afraid of being scammed 😬). I sold it 2 days after posting it for \$3500 cash, \$500+ profit in 2 days. I was hooked.

Since then there's been a lot of ups and downs, and inconsistencies - but I grew pretty slowly over the next 10 months and managed to sell 36 watches for almost \$17k in profit in 10 months of 2020.

1st year stats:

Total Watches sold: 51

Total profit: \$28,315.04

Watches sold at a loss: 0

Average ROI: 2020 - 20.69% , 2021 - 34.83%

Current inventory - 9 pieces for sale

He did 51 deals for a total profit of \$28,315.

Want to know the best part?

ZERO watches sold at a loss.

That's why sticking to the Bottom Cash Value formula is essential.

Remember Ruben from earlier?

Here's how many losses he sold at a loss in his first year flipping watches:

2024 Wrap-up and End of Year Figures!

What an incredible 2024 it has been for our watch businesses! I am **sharing some quick stats** with all of you to show you not only what is possible, but also what is so real and so attainable by just doing this as a side business and sprinkling that with a solid mindset!

Not only did my wife and I start operations this year on our LLC, but the figures you are about to see below are only partial for 2024 since first watch sold occurred during day 1 of Fast Track Coaching 6 on April 15th, 2024.

Here we go!

SkyCloud Luxe 2024 Year End Numbers

First watch sold: April 15th, 2024

Total watches sold (as of Dec 31st, 2024): **180**

Total sales: **\$1,002,964** in our first 225 days.

Avg sale price: **\$5572**

Lowest gross sale: **\$1400** (Long1nes Master Collection Chrono)

Highest gross sale: **\$32,500** (AyPee ROO Rose Gold)

Lowest net profit on a watch: **\$93** (Br3itling)

Highest net profit on a watch: **\$5560** (Hubl0t)

Losses: **1 (0.005%)**

Highest net loss: **-\$250** (Tud0r)

That's right...

Out of 180 watches sold only ONE was at a loss for \$250.

So know your numbers and you'll eliminate any risk.

Step #2 - Startup Phase: How To Get Started Today With Just \$1,500 And Access To a Shipping (e.g. FedEx)

Believe it or not, you don't have to physically visit other jewelers or watch dealers to buy/sell watches.

Maybe that was the case 20 years ago.

With all the marketplaces and platforms available today, pretty much everything can be done online (and from the comfort of your own home).

Here are just some of the most popular places I recommend beginners starting out to find watch deals online:

- eBay.com
- RolexForums.com
- Facebook Groups
- Chrono24.com
- WatchUSeek.com
- Grailzee.com
- And many more...

And thanks to shipping services like FedEx, you're not limited to selling your watch to people in your local area only.

Your customer base is literally the entire US (or world).

But you might be thinking...

“Aren't watches crazy expensive like \$10,000 or more?”

I used to think the same.

But the reality is you can get started today with just \$1,500 to buy your first watch.

And in a lot of cases you can even get started with less.

Remember...

We're not going after cheap 'luxury' watches you can find at department stores that sell for \$1,500 brand-new and are worth 80% less the moment you walk out of that store.

We're going after real luxury watches that typically cost \$5,000+ when brand-new, but have lost the majority of their value from normal depreciation and holding steady.

When you can buy these watches at Bottom Cash Value, it's basic arbitrage to pocket the difference.

Just like these students who got started with \$1,500 or less and still made impressive profits...

Luis made \$1,264 profit on a \$750 watch

Luis

- Net after shipping and fees \$2014.51
- Profit: 1264.61 (68% ROI)
- Hold time: 1 week

Very Excited to complete my first trade! Customer ended up being happy and saying he would come back for more pieces for him or his buddies.

Jonathan made \$559 profit on a \$940 watch

Jonathan

Case Study

Interesting one for me which involved a trade on a watch I previously sold. See details below ROI if interested

In :\$940.92

Chrono24

Out: \$1500

Local - OfferUp

Net Profit: \$559.08

ROI: 62.7%

Trade : Tag Heuer Formula 1 for Tag Heuer Autavia

I sold this Autavia previously to a member in a Tag Facebook group for \$1800. He mentioned he wanted the formula 1 pictured below throughout our various conversations.

I mentioned I could source it for much less than what he would pay for it new, which I think was around \$1400 or so. He went on to say he didn't have the cash at the time but he would trade back the Autavia for one if I could find it.

I had multiple offers at \$1500 previously on the Autavia before selling to this individual . So I knew I could likely move it for a quick profit .

Long story short..I found the exact Formula 1 he wanted on Chrono24 for about \$875, and paid \$940.92 after tax and shipping . Once I received the Autavia back, I reached out to one of the previous offers I had and he was still interested so we met locally and made the deal.

Vinny made \$527 profit on a \$1507 watch

Case Study #7 - Valueyourwatch.com shoutout

In: \$1507

Out: \$2034 (after Stripe fees and shipping)

Net: \$527 (35%)

Hold time: 3 days

After my 5th Aquaracer I told myself I wouldnt move another one but this opportunity was too good to pass up.... classic case of the seller needed cash and wanted to offload this piece. The 'poor mans' Hulk as I called it on my list, was something I wanted to enjoy since I started trading watches. I knew there were few in circulation and it ... [See more](#)

Step #3 - Rapid Scaling: How To Make \$10k+ Per Month In 45 Days Or Less

Imagine you had a magic money multiplier machine.

And every time you put money into this machine, it returns your money **PLUS** 20% more.

How much money would you put into this machine?

Probably as much as possible, right?

Well that's what flipping luxury watches is like.

With watch flipping, expect an AVERAGE 15-20% ROI.

Meaning if you buy a watch for \$1,500, you can expect to get back \$1,800 when you flip it and pocket \$300.

Of course it's never going to be exactly 15-20% for every watch you flip.

We're talking about averages here.

Sometimes you might see only a 10% ROI, but sometimes you might see a 30%, 40%, or even 50% ROI.

Here's an actual example of one of my students, Andre, in his very first month breaking down his exact profit margins per deal.

Andre [redacted] is 😊 feeling motivated.

			Paid	Sold		Days	ROI	Avg. Profit
			\$56,040	\$67,402		20.1	20.3%	\$947
								Total Profit
								\$11,362

Over the course of 12 deals he made in between a 6% to 35% ROI per deal.

But what matters most is the 20% **AVERAGE** ROI.

Now I want to show you how scalable flipping luxury watches can be.

So for this example, let's set a few "rules:"

Rule #1: You start with a \$1,500 starting budget for your first watch.

Rule #2: Assume each watch gets a 20% ROI on average.

Rule #3: Assume it takes about 3 days on average to sell a watch.

Rule #4: You re-invest all the profits into the next watch and repeat the process.

Here's how the math would play out:

- Watch #1: \$1,500
- Watch #2: \$1,800 (\$300 profit)
- Watch #3: \$2,160 (\$360 profit)
- Watch #4: \$2,592 (\$432 profit)
- Watch #5: \$3,110.40 (\$518.40 profit)
- Watch #6: \$3,732.48 (\$622.08 profit)
- Watch #7: \$4,478.98 (\$746.50 profit)
- Watch #8: \$5,374.78 (\$895.80 profit)
- Watch #9: \$6,449.74 (\$1,074.96 profit)
- Watch #10: \$7,739.69 (\$1,289.95 profit)
- Watch #11: \$9,287.63 (\$1,547.94 profit)
- Watch #12: \$11,145.16 (\$2,229.03 profit)

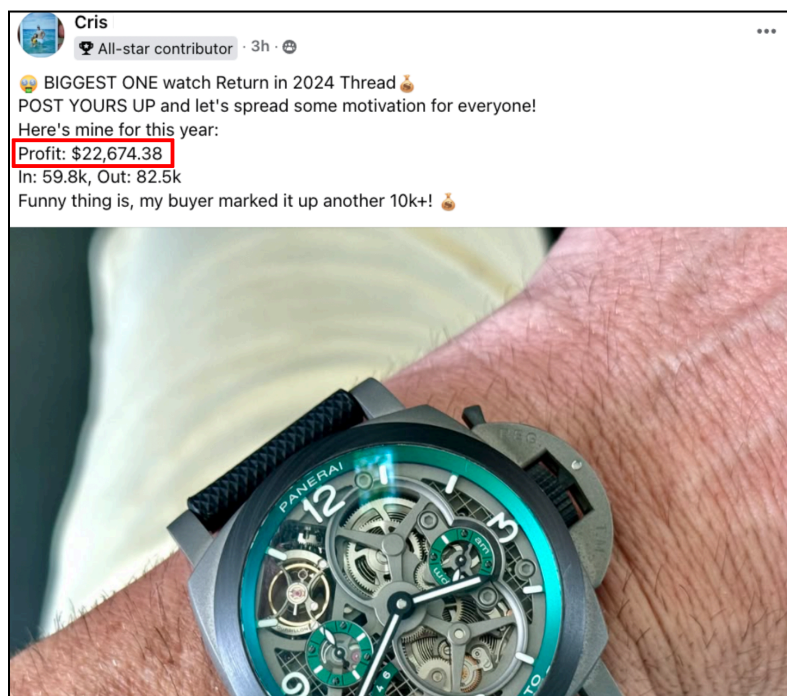

As you can see, you just turned \$1,500 into over \$10,000 profit in less than 45 days by recycling your profits over and over.

Here's the crazy part...

Once you get good... all it takes is one or two watch deals to make the same amount of money.

Meaning instead of flipping 10 watches to make \$5,000...you can flip 1 watch and make \$5,000.

Here's one of my students who made almost \$23k flipping one watch!

To be realistic... that won't always happen.

But there are home runs every once in awhile.

Your income literally skyrockets overnight once you start flipping more expensive watches.

And it doesn't take any more work to flip more expensive watches than it does to flip cheaper ones.

This is how you're able to scale watch flipping FAST.

And it's how countless people like my student, Vito, are making over \$5k within their first month of flipping watches.

Case Study #3
2021 Panerai Radiomir 45mm PAM00754 Men's Black Watch

In: 2,000
Out: 4,000
Profit: 2,000
Profit margin: 100%
Hold time: 4 days

Total profit for my first month: 5,150
3 more watches waiting to be sold. We shall see!

Bought from a local watch enthusiast, and made a great relationship in the process. Said he likes to buy a new Panerai every couple months and then sell it. Just his thing and doesn't care about the money side of it.

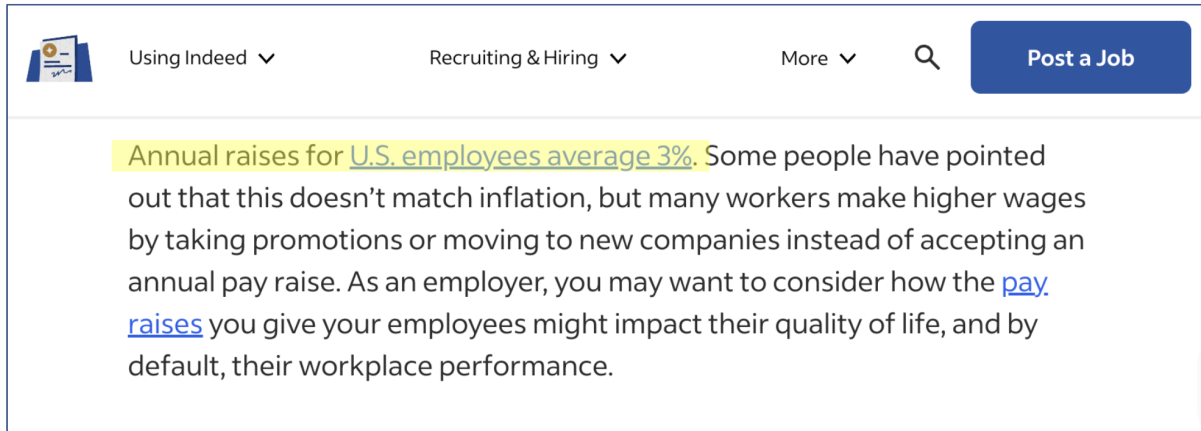

So great new find for me! Haha
This watch game just seems to keep debunking all my questions I had coming into it.

The money piece is great but the relationships along the way are priceless!

To put that in perspective for you....

If you made \$75k/yr at a 9-5 job (considered good)... A 3% raise would only be \$2,250 before taxes.

The screenshot shows a navigation bar with 'Using Indeed', 'Recruiting & Hiring', 'More', a search icon, and a 'Post a Job' button. Below the bar, a text snippet is highlighted in yellow: 'Annual raises for U.S. employees average 3%.' The text continues: 'Some people have pointed out that this doesn't match inflation, but many workers make higher wages by taking promotions or moving to new companies instead of accepting an annual pay raise. As an employer, you may want to consider how the [pay raises](#) you give your employees might impact their quality of life, and by default, their workplace performance.'

All it takes is literally one watch flip to make more than your annual raise.

No wonder more and more people are taking on side hustles to take control of their finance rights?

Luxury Watch Flipping Case Studies: How Normal People Earn Thousands Of Dollars Using This Bulletproof Strategy

Now I know this might still be overwhelming.

So let me break down the watch flipping process with some case studies done by our very own students:

Case Study #1: Newbie Watch Flipper Makes \$1,000 Profit In 2 Days With Facebook Marketplace

 Top Contributor · 20h · 🌐

Case study #3

Superocean 48m Blue Ceramic 🤖 Watch + Box only

In - 1800 fb marketplace

Out - 2900 - 75\$ shipping - fb group

Profit - 1025\$

Hold time - 2 days

Taking the money back to the same seller and buying another watch for 1750 and I will have another case study soon.

My advice for someone new. Im already 3 deals in and only half way through the part 1 training. Just have the balls to try and fail. People with those attitudes usually win. Network with traders and get good at finding out what watches are selling for then finding them cheaper it's that easy. They sell themselves once you have them!

Don't stress yourself out risking your capital to strangers or over thinking deals. Be willing to drive to make deals happen so you can read people and don't fall in love with the watch. Fall in love with the business. Then you'll have plenty of watches and money.

Imagine making \$1,000 profit off an \$1,800 watch.

Because that's exactly what the student above did as a complete beginner.

And the process is SOOO simple.

All the student above did was:

1. **Source the watch** - In this case he used Facebook Marketplace (one of the largest online marketplaces for used luxury watches)
2. **Improve on the listing** by taking better photos, writing a better description to attract more qualified buyers, etc...
3. **Re-listed the watch** on Facebook Marketplace and sold it in just 2 days.

The watch flipping game really is that simple and there's no reason why you can't get similar results.

Case Study #2: Basic Arbitrage Method Made This Student \$3,610 In 10 Days

 **Josh Sheely** 
Top contributor · 4 hours ago · 

Case Study
Hblot Classic Fusion 'Italia'
In: \$4356 (eBay)
Out: \$8150 (Grailzee)
Net after fees/shipping: \$3610 (83%)
Hold time: 10 days

Most people think that you can only buy and sell watches off sites like Facebook, eBay, Craigslist, etc...

And while all those are all great places to buy and sell watches...

There's one platform that's unknown to 99% of watch flippers.

And that platform is called Grailzee, an online luxury auction house specializing in luxury watches.

It's hands down the fastest growing luxury watch auction house online right now.

And by using the "Grailzee Arbitrage Method", you can literally buy a watch from another source (e.g. Ebay), list it on Grailzee, and collect the profits.

You don't need to have any experience, reputation, or skills to pull it off either.

Which is how the student above made \$3,610 in 10 days with this exact method.

All he literally did is buy a watch on one place and relist at another platform for more money.

While there's no such thing as free money, this secret arbitrage method is about as damn close as you're going to get.

Case Study #3: Get An Inside Look At What Going From Zero To Full-Time Income While Doing This Part-Time

Daniel

After almost a complete year of taking the course and selling my first watch, I've sold a little over 100 watches and hit so far over \$85k in profits.

Here's some major highlights and advice to anyone starting out and please don't hesitate to ever reach out. I'm always happy to help.

WTA truly works. Sticking to the basic teachings found in Part 1 can get you far, if you put the work in. Be passionate and smart. This has been without a doubt, the best investment I have made towards any kind of financial education.

For the last 4 months I have been doing this full time while my residence papers get approved. I have been able to structure my business and hit consistent \$10-15k profit months, and highest profit month at \$21,450.

In Daniel's first year he flipped 100 watches and made \$85k in profit.

Not sales.

Profit.

But remember... everything that looks big has always started small to start.

Here's a look at one of Daniel's early case studies so you can see his progression...

 **Daniel Borrero** ▶ Watch Trading Academy Insider Members

Case Study #14
Panerai Submersible Bianco PAM01223
In: \$6,000, Shipping: \$50, Wire fee: \$25
Total IN: \$6,075
Out: \$7,250 local deal, no shipping no fees.
Net profit: \$1,175, Hold time: 9 hours

Managed to finally get my first over \$1k profit. Saw an attractive listing price when buying and managed to get it down further more.

Was able to recycle a retail client I had from a couple of months back who previously bought another Panerai from me. He's super excited he found someone who gets him good deals while not risking his money online. Now he wants me to find him a Rolex Daytona. If anyone has one, let's try to work something out!

Thanks WTA!

It wasn't until his 14th watch deal for him to break \$1,000 profit on a single deal.

And this deal didn't even take more than a day.

It only took 9 hours lol.

But that's what happens when you stick to the process.

Because it actually gets easier the more deals you do.

You gain experience.

You gain confidence.

Your network grows.

And clients start coming to you instead.

There's something magical about hitting \$10k/month (with any side hustle).

For many people, it's the "magic number" that finally gives them financial freedom and the ability to quit their 9-5.

And that's exactly what Daniel was able to do thanks to flipping watches.

But for other people...

It's not always about the money.

While that's great and all...

It's about your 'why'.

Maybe you're happy with your job and want to supplement your income.

Maybe you need money to help pay down your mortgage.

Maybe you need money to pay for an upcoming vacation.

For our member Angie, it was just so she could buy her son a new car.

She had a goal of earning enough money in 18 months.

Fast forward in 11 months, she did just that 😊

Angie-Rodney Troutz

July 4, 2024 · 🌍

What's your why? This is mine. And I've been so excited to make this post and share that watch trading does work, no matter how big or small your goals are.

I started WTA exactly a year ago with the goal of passively trading a few watches here and there in order to save the cash to buy our son his first vehicle. He was 14 1/2 at the time and I told myself I had 18 months to reach my goal. Honestly, in the back of mind if I could make a couple thousand to help towards it and get to wear some cool watches I thought that would be great.

Fast forward 11 months and I just paid cash for it entirely with watch profits. That's after I've paid for courses, Mastermind, ECH 1, logo design, business costs, you name it. I'm averaging almost 13% profit margin over my first year. Did I make \$100k? Nope, not even close. But Do I believe I can? ABSOLUTELY! And now that I've met my first goal, it's all in on this business!

Is it an Gwagon or a FrrAri? Not yet, but that smile on my son's face tells you that it's his dream car. And that is what's possible with WTA.

Thank you to way too many of you here that have helped me for no gain for yourself. You helped make this dream come true.

Hopefully by now you can see how profitable flipping luxury watches is...

- ✓ Very low barrier of entry so anyone can participate at any budget.
- ✓ No paperwork, legal BS, or third parties involved.
- ✓ Not time intensive and can be done with just 1-2 hours a day.
- ✓ No need to stock lots of inventory or have brick and mortar store.
- ✓ Fast payments + Overnight shipping = Quick profits.
- ✓ The right watches retain value so your money is safeguarded.
- ✓ Ability to liquidate if needed within 24 hours to protect your money.
- ✓ Location doesn't matter so can work from home (or anywhere).

With watch flipping, virtually anyone can start making an extra \$3,000, \$5,000, or even \$10,000+ per month.

And it can happen in less than 30 days.

What would that do for your life?

With watch flipping you could...

- **Earn extra money to help cover bills and expenses** - With inflation rising, the cost of living has never been more expensive and unfortunately most people can't survive with a normal 9-5. But with just a few watch flips per month, one watch can literally cover your car payment, rent, groceries, and so much more.
- **Become your own boss and quit your 9-5** - If you dream of quitting your 9-5, working just a few hours per week, and making six figures or more...then watch flipping can get you there ASAP. As you saw above, you can realistically hit \$10,000+ profit per month in just a matter of weeks. So as long as you take consistent action, you're a lot closer to quitting your job than you think.
- **Save up for retirement, grow your kid's college fund, or support your family** - Whatever the reason it doesn't matter. Because this is hands down one the fastest, effective, and underrated side hustles out there to fast-track all your financial goals. And you can get started today with no experience or skills.

The sky truly is the limit and your income potential is only limited by your work ethic.

And not only do you get to make money, but you also get to wear some of the nicest watches from some of the world's most exclusive brands for free.

Find me another side hustle that lets you wear sick watches for free 😊.

Which leaves you 3 options:

Option #1: Do nothing. Be complacent and go on with your life. If the economy or your job security changes, then you will live with the sequences.

Option #2: Start flipping watches on your own - go out to websites like eBay and start making offers to find watches to flip. However, if you've never done this before, there's a small risk of getting scammed, buying the wrong watch, or losing money.

Option #3: Learn the exact step-by-step blueprint from someone who has made millions of dollars flipping watches and taught over 22,000 members how to do the same (many of which were able to quit their job).

If you choose Option #1 or 2, I wish you the best of luck and we can part ways here.

If you choose Option #3, then keep reading...

Introducing Watch Training Academy - The Ultimate Shortcut To Making Six-Figures Per Year Flipping Luxury Watches

What you've learned so far is just a tiny snippet of what you'll find inside my flagship Watch Training Academy program.

In fact, everyone you've seen mentioned is a member of Watch Training Academy.

And I can confidently say it's the #1 program because literally nothing else like it exists out there.

With over 22,000 members worldwide and countless success stories (like the ones I've show you)...

Our watch flipping strategies have been battle-tested to hell and back.

Watch Trading Academy is a complete suite of educational trainings, resources, along with the support of the largest community of watch enthusiasts and traders in the world.

All you need to get started is \$1,500 of capital to buy your first watch, a phone or computer to search for deals, and access to shipping.

It doesn't matter if you're a watch collector looking to upgrade your collection without overpaying... or just looking for a simple side hustle to add extra income...

Watch Trading Academy guides you through the entire process from scratch so that even absolute beginners with zero prior knowledge of watches can get started and complete their first deal within 30 days.

Here's just a taste of what you'll learn inside Watch Trading Academy:

- **6 hours of step-by-step training** that will walk you through the entire process of buying and selling your first luxury watch for profit.
- **Archive of 500+ real-life case studies:** See the exact profits made down to the penny (including additional costs like shipping, insurance, repairs, etc...)
- **The best watch models** to go after if you're a beginner for a guaranteed ROI.
- **How to spot grey market and counterfeit watches** from a mile away so you never get scammed.
- **The #1 site I recommend to source hot deals** (this site is flooded 24/7 with a non-stop army of hungry buyers and sellers).
- **My secret "bottom cash value" formula** for calculating the right price to buy a watch at so it's virtually impossible to lose money.
- **How to get a minimum 20% profit** margin on every flip you do.
- **How to build a world-class network** of hungry watch buyers in record time and become the "go-to" guy for watches in your circle.
- **The #1 skill** you must master to make a killing in watch trading (99% of watch traders ignore this).
- **Watch Listing Mastery:** How to correctly price and list your watch so it sells ASAP (even if your watch is priced higher than everyone else's).
- **My "Wealth Transfer" strategy** that lets you turn traditional liabilities into income generating assets.
- **The one watch flipping strategy** that can make you up to \$5,000 profit on a single flip.

- **How to take "world-class" photos** of your watches with nothing more than your smartphone to dramatically increase the value of your watch.
- **How to safely send and receive payments** without losing your shirt on processing fees.
- **1-on-1 interviews with \$100k, \$250k, and \$500k Club students.** Discover how complete newbies started from nothing and all made six-figures in profit.
- **My foolproof process for avoiding fakes and scams** (including an exact video breakdown of how I inspect watches).
- **"Over the shoulder" watch sourcing walkthrough:** Watch me as I walk you through my exact process for sourcing watches online.
- **Lifetime access to the VIP Facebook Community:** Network with other members, ask questions, and get support 24/7/365.
- **30-Day risk-free money back guarantee.** If for any reason you don't see the value or you can't flip your first watch for profit (even with our help)... We'll refund your entire investment. No questions asked.
- **And much more...**

I created Watch Trading Academy to be as "idiot proof" as possible.

I know how intimidating the luxury watch game can be.

Which is why I created Watch Trading Academy with complete beginners in mind so that anyone can get started today and see results within 30 days.

You don't need any prior knowledge of luxury watches.

You don't need to know how a watch works.

You don't need to worry about buying fakes or getting scammed.

And you don't need to worry about figuring out what the best price to buy and sell at is.

Everything and so much more is covered step-by-step inside Watch Trading Academy.

Plus if you ever need help you can, you have access to myself and thousands of Watch Trading Academy members who have been in your exact shoes.

Sounds Great, But How Much Does It Cost to Join Watch Trading Academy?

Now, you might be wondering:

"This sounds great, but what's the cost?"

Well, let me ask you this:

What would it be worth to you to have a foolproof system that could help you predictably earn an extra \$3,000, \$5,000, or even \$10,000 per month?

Many of our members go on to six and even seven figures in profit per year just like these people:

The current retail price of Watch Trading Academy is \$997.

But because you downloaded this beginner's guide and reached the end, you've shown me how serious you are about changing your financial future.

So I'm going to make you a special offer.

For a limited time only, I'm offering you the chance to join Watch Trading Academy for 50% off the normal price.

Which means you can get full lifetime access to Watch Trading Academy training, resources, and community for just \$497.

But remember, this 50% discount is only available for a limited time.

Just click the button below to get all the details:

Special Limited Time Offer

Join Watch Trading Academy For 50% Off
(Normal Price- \$997)

You've just seen how incredibly simple and lucrative watch flipping can be...

Remember... all it takes is 1 deal to cover your entire membership to Watch Trading Academy.

And if for whatever you're not satisfied with the content, simply shoot us an email and we'll send you a full, complete refund.

No hard feelings :)

So if you're ready to transform your financial future with one of the most under the radar hustles out there, [click here to access your special 50% off special offer \(ends soon\)](#).

Hope to see you inside,

- PJ
